Professional Summary

Data Analyst with 5+ years of IT experience, including 2+ years in Data Analytics after transitioning from Java application development. Skilled in SQL, Python, Power BI, and Excel for exploratory data analysis, dashboard development, API/JSON data analysis, and reporting automation. Experienced in transforming structured and semi-structured data into actionable business insights, developing KPI dashboards, performing data quality validation, and enabling data-driven decision-making through scalable analytics solutions.

Education

Birla Institute of Technology

Master of Technology(Software Systems)

2021 – 2024

Pilani, Rajasthan

Amrita School of Arts and Sciences

Bachelor of Computer Applications

2017 – 2020

Mysuru, Karnataka

Experience

Tata Consultancy Services

August 2025 – February 2026

IT Analyst – Data Analytics & AI — Client: Stellantis Finance (BFSI – Automotive Financing)

Bengaluru, Karnataka

- Stellantis Finance - BFSI, Automotive Finance
- Analyzed API-delivered JSON data using Python and Pandas to identify sensitive financial and customer information through business rule validation.
- Transformed nested JSON data into structured datasets using Pandas, streamlining data extraction, analysis, and reporting workflows.
- Performed exploratory data analysis (EDA) and data quality validation to identify missing values, schema inconsistencies, and data formatting issues before downstream processing.
- Developed interactive Power BI dashboards to visualize incident trends, risk scores, ticket assignment, and daily, monthly, and yearly operational KPIs.
- Designed DAX measures and KPI visualizations to analyze incident distribution, priority, ownership, and operational performance, improving reporting efficiency and business visibility.

Wipro Technologies

January 2024 – July 2025

Project Engineer – Data Analytics & AI — Client: FedEx (Retail, Shipping & E-Commerce)

Bengaluru, Karnataka

- Performed SQL-based analysis of product demand, customer purchasing behavior, regional trends, and repeat purchase patterns to support data-driven product prioritization.
- Developed Python scripts to consume REST APIs and extract customer, product, and order data, enabling business stakeholders to identify high-demand products for onboarding into the WOLS platform.
- Analyzed transportation performance across the U.S. and Canada by evaluating transit times, SLA compliance, and seasonal delivery trends to assess product onboarding feasibility.
- Identified winter-related transportation bottlenecks in snow-prone regions and recommended regional rollout and inventory planning strategies to improve SLA compliance and operational efficiency.
- Developed interactive Power BI dashboards to visualize product demand, transportation KPIs, warehouse performance, inventory availability, and customer ordering trends, enabling data-driven business decisions.

Wipro Technologies

September 2020 – December 2023

Project Engineer- Java Front End Developer

Bengaluru, Karnataka

- Analyzed application performance using Splunk, AppDynamics, thread dumps, and heap dumps to identify and resolve production issues.
- Led API modernization by implementing REST API versioning, integrating Swagger documentation, and migrating applications from on-premises infrastructure to private cloud with minimal downtime.
- Led cloud migration and centralized configuration initiatives, improving deployment reliability and reducing operational downtime.
- Strengthened application security by resolving XSS and FOSS vulnerabilities and implementing OAuth2/OKTA-based authentication for secure inter-service communication.
- Supported production releases and provided Tier 0-2 application support by troubleshooting critical issues and ensuring high system availability.

Projects GitHub/Repository

USA Healthcare Data & India CPI Analysis | *SQL, Excel*

- Analyzed healthcare claims and patient data using SQL to identify treatment trends, cost distribution, and hospital performance metrics.
- Built Excel dashboards with Pivot Tables and charts to visualize patient demographics, healthcare utilization, and key operational KPIs.
- Performed exploratory analysis on Consumer Price Index (CPI) data to evaluate inflation trends across sectors and time periods.
- Developed interactive Excel reports to compare category-wise inflation, monthly variations, and long-term price movement.

E-Commerce Sales Analysis | *SQL, Power BI*

- Analyzed sales, customer, and product data using SQL to identify revenue drivers, customer purchasing behavior, and regional performance.
- Designed interactive Power BI dashboards to monitor KPIs including sales, profit, order trends, and category-wise performance.

Vehicle Sales Analysis | *Power BI*

- Developed Power BI dashboards to analyze vehicle sales trends across regions, manufacturers, and product segments.
- Created KPI visualizations for sales growth, market share, and customer demand to support business decision-making.

Retail Sales Case Study – Exploratory Data Analysis | *SQL*

- Conducted exploratory analysis on retail sales data to evaluate customer purchasing patterns, product performance, and revenue trends.
- Applied advanced SQL techniques including window functions, ranking, and aggregations to answer business-driven analytical questions.

COVID-19 Data Analysis | *Python, NumPy, Pandas Matplotlib*

- Performed exploratory data analysis on COVID-19 datasets using Python to identify infection trends, mortality rates, and vaccination progress.
- Utilized Pandas, NumPy, and Matplotlib to clean, transform, and visualize large datasets for meaningful insights.

PhonePe Transaction Analysis | *Python, NumPy, Pandas, Matplotlib*

- Analyzed digital payment transactions to identify state-wise adoption, transaction growth, and user behavior patterns.
- Built visualizations and performed statistical analysis using Python to highlight regional trends and payment ecosystem insights.

Skills

Programming Languages: SQL, Python, Java, HTML/CSS

Analytics & Business Intelligence: Power BI, Microsoft Excel, Microsoft Power Query, DAX, Data Modeling, Data Cleaning, Exploratory Data Analysis (EDA), Dashboard Development

Libraries: Pandas, NumPy, Matplotlib, Seaborn

Monitoring & Observability: Splunk Cloud, AppDynamics

Developer Tools: Jupyter Notebook, VS Code, CloudOps, GitHub, Jenkins

Languages: English, Kannada, Hindi

Certifications

Advanced Certification in Data Analytics with Generative AI – Coding Ninjas

SQL for Data Analytics – Coding Ninjas

Data Visualization with Power BI – Coding Ninjas

Programming in Python – Coding Ninjas

Introduction to Analysis & Excel – Coding Ninjas

Leadership & Achievements

- Received the **Champions League Award (Q4 - 2022)** for successfully delivering application enhancements, resolving critical defects, and supporting key project initiatives.
- Recognized with the **Victory League Award (Q3 - 2023)** and **Above & Beyond Award (Q2 - 2024)** for consistently exceeding project expectations and delivering high-quality solutions.
- Awarded the **Flag Bit Bearer – Being Responsive** recognition for proactively contributing to analytics initiatives, collaborating with cross-functional teams, and ensuring timely project delivery.
- Organized weekly employee engagement activities, festival celebrations, and team events at FedEx, fostering collaboration and strengthening workplace culture.
- Recognized as an **Xcelerate Warrior** at TCS for demonstrating strong learning agility, technical excellence, and commitment to continuous professional development.
