Professional Summary

Data Analyst with 1 year 11 months of experience and 5 years 5 months of overall IT experience, including 3 years 6 months as a Java Developer. Experienced in SQL, Python, Power BI, ETL, data visualization, API data analysis, and business intelligence reporting. Proficient in Python (Pandas, NumPy, Matplotlib, Seaborn), SQL, and Power BI to build dashboards, automate reporting, and generate actionable business insights. Prior experience includes Java, Spring Boot, REST APIs, cloud migration, application performance analysis (Splunk, AppDynamics), production support, and secure application development.

Education

Birla Institute of Technology

Master of Technology(Software Systems)

2021 – 2024

Pilani, Rajasthan

Amrita School of Arts and Sciences

Bachelor of Computer Applications

2017 – 2020

Mysuru, Karnataka

Experience

Tata Consultancy Services Limited

IT Analyst

August 2025 – February 2026

Bengaluru, Karnataka

- Analyzed API-delivered JSON data using Python and Pandas to identify sensitive financial and customer information through business rule validation.
- Transformed nested JSON responses into structured datasets using pandas, enabling efficient analysis and reporting workflows.
- Performed exploratory data analysis and data quality checks to identify missing values, schema inconsistencies, and formatting issues prior to downstream processing.
- Developed interactive Power BI dashboards to monitor incident trends, risk scores, assignment distribution, and ticket volumes across daily, monthly, and yearly periods.
- Created DAX measures and KPI visualizations to analyze incident distribution, priority, ownership, and operational performance, improving reporting efficiency.

Wipro Technologies

Data Analyst I

January 2024 – July 2025

Bengaluru, Karnataka

- Developed Python scripts to consume REST APIs and extract customer, product, and order data for analysis, collaborating with business stakeholders to identify high-demand large products suitable for onboarding into the WOLS platform.
- Performed SQL-based analysis of product demand, customer ordering behavior, regional trends, and repeat purchase patterns, enabling data-driven product prioritization.
- Analyzed transportation performance across the US and Canada by evaluating transit times, SLA compliance, and seasonal delivery trends to assess operational feasibility for WOLS product onboarding.
- Identified winter-related transportation bottlenecks in snow-prone regions and recommended regional rollout strategies and inventory planning improvements to maintain SLA compliance.
- Developed interactive Power BI dashboards to visualize product demand, transportation KPIs, inventory availability, warehouse performance, and customer ordering trends for business stakeholders.
- Presented analytical insights and recommendations on product onboarding, inventory optimization, and transportation performance, enabling data-driven operational and business decisions.

Wipro Technologies

Front End Developer

September 2020 – January 2024

Bengaluru, Karnataka

- Analyzed application performance using Splunk, AppDynamics, thread dumps, and heap dumps to identify and resolve production issues.
- Led API modernization by implementing REST API versioning, integrating Swagger documentation, and migrating applications from on-premises infrastructure to private cloud with minimal downtime.
- Led cloud migration and centralized configuration initiatives, improving deployment reliability and reducing operational downtime.
- Strengthened application security by resolving XSS and FOSS vulnerabilities and implementing OAuth2/OKTA-based authentication for secure inter-service communication.
- Supported production releases and provided Tier 0–2 application support by troubleshooting critical issues and ensuring high system availability.

USA Healthcare Data Analysis | *SQL, Excel*

- Analyzed healthcare claims and patient data using SQL to identify treatment trends, cost distribution, and hospital performance metrics.
- Built Excel dashboards with Pivot Tables and charts to visualize patient demographics, healthcare utilization, and key operational KPIs.

India CPI Inflation Analysis | *SQL, Excel*

- Performed exploratory analysis on Consumer Price Index (CPI) data to evaluate inflation trends across sectors and time periods.
- Developed interactive Excel reports to compare category-wise inflation, monthly variations, and long-term price movement.

E-Commerce Sales Analysis | *SQL, Power BI*

- Analyzed sales, customer, and product data using SQL to identify revenue drivers, customer purchasing behavior, and regional performance.
- Designed interactive Power BI dashboards to monitor KPIs including sales, profit, order trends, and category-wise performance.

Vehicle Sales Analysis | *Power BI*

- Developed Power BI dashboards to analyze vehicle sales trends across regions, manufacturers, and product segments.
- Created KPI visualizations for sales growth, market share, and customer demand to support business decision-making.

Netflix Content Analysis | *Power BI*

- Analyzed Netflix content library to identify trends by genre, country, release year, ratings, and content type.
- Built interactive dashboards enabling exploration of viewing trends and content distribution across multiple dimensions.

E-Commerce Case Study – Exploratory Data Analysis | *SQL*

- Performed end-to-end SQL-based exploratory data analysis to uncover customer behavior, sales trends, and product performance.
- Used joins, CTEs, window functions, and aggregate queries to generate actionable business insights from transactional data.

Retail Sales Case Study – Exploratory Data Analysis | *SQL*

- Conducted exploratory analysis on retail sales data to evaluate customer purchasing patterns, product performance, and revenue trends.
- Applied advanced SQL techniques including window functions, ranking, and aggregations to answer business-driven analytical questions.

COVID-19 Data Analysis | *Python, NumPy, Pandas Matplotlib*

- Performed exploratory data analysis on COVID-19 datasets using Python to identify infection trends, mortality rates, and vaccination progress.
- Utilized Pandas, NumPy, and Matplotlib to clean, transform, and visualize large datasets for meaningful insights.

PhonePe Transaction Analysis | *Python, NumPy, Pandas, Matplotlib*

- Analyzed digital payment transactions to identify state-wise adoption, transaction growth, and user behavior patterns.
- Built visualizations and performed statistical analysis using Python to highlight regional trends and payment ecosystem insights.

Technical Skills

Languages: SQL, Python, Java, HTML/CSS

Analytics & BI: Power BI, Microsoft Excel

Databases: MySQL, Postgres

Monitoring & Observability: Splunk Cloud, AppDynamics

Developer Tools: Jupyter Notebook, VS Code, CloudOps, GitHub, Jenkins

Libraries: pandas, NumPy, Matplotlib, Seaborn

Certifications

Advanced Certification in Data Analytics with Generative AI – Coding Ninjas

Introduction to Analysis & Excel – Coding Ninjas

Data Visualization with Power BI – Coding Ninjas

SQL for Data Analytics – Coding Ninjas

Programming in Python – Coding Ninjas

Leadership & Achievements

- Received the **Champions League Award (Q4) - 2022**
- Recognized with the **Victory League (Q3)-2023** and **Above & Beyond (Q2)-2024** awards for consistently exceeding project expectations
- Awarded the **Flag Bit Bearer – Being Responsive** recognition for proactively contributing to analytics initiatives, collaborating with cross-functional teams
- Organized weekly employee engagement activities, festival celebrations, and team events at FedEx, promoting collaboration and workplace culture.
- Recognized as an **Xcelerate Warrior** at TCS for demonstrating strong learning agility, technical growth, and commitment to professional development.
